PRODUCT STRATEGY MANAGER | AI & REVENUE-DRIVEN INNOVATION

Visionary product leader with a business-first mindset, technical depth, and strong user empathy. Proven track record of identifying $100B+ opportunities and solving 100+ real user pain points using a hybrid skill set in Product Strategy, AI, UX, Psychology, and Full-Stack Development. Adept at aligning stakeholders, engineering, and design teams to shape the future of intelligent, user-centric products.

Currently building and prototyping market-defining innovations with potential fit at Meta, Google, and other AI-first companies.

EXPERIENCE

Product Strategy | 2 Years Self-Led Innovation

Remote | 2021 – Present

Discovered and validated high-potential, multi-billion dollar product opportunities across AI, SaaS, and Consumer Tech - Developed 100+ user pain point–based product ideas backed by market research and user interviews - Built AI-powered early-stage tools (e.g., voice-driven productivity systems to reduce cognitive/manual overload) - Crafted monetization models with high scalability and long-term growth potential - Applied prompt engineering techniques to design intelligent, user-specific AI interactions - Independently collaborated with designers and developers to prototype and test product concepts.

Volunteer Experience

Event Coordinator & Creative Lead – School Celebrations

South India

Directed event planning and creative execution for school-wide celebrations - Managed logistics and engagement for 300+ attendees - Applied behavioral insights to improve inclusivity and participant experience.

KEY SKILLS & COMPETENCIES

AI-Driven Product Strategy - Billion-Dollar Opportunity Discovery - Market Research & Data-Driven Decision Making - Product Roadmapping & Go-To-Market (GTM) Strategy - Cross-Functional Collaboration (Tech + Design + Biz) - Agile & Stakeholder Communication - Psychology-Driven UX & Human-Centered Design - Prompt Engineering & Generative AI Integration - Monetization Models & Growth Loops - Innovation for AI-Native Ecosystems (Meta, Google, etc.)

EDUCATION & CERTIFICATIONS

CS50: Introduction to Computer Science – Harvard University (Online)

CS50 for Business Leaders – Harvard University (Online)

Google Product Management Certificate – Google

Product Management for AI & Data Science – Udemy

Psychology & Behavioral Science in Product Design – [APA Certified]

Prompt Engineering & AI Optimization – Self-Taught (Project-Based)

Bridgense Leadership Program – Teamwork, Goal-Setting & Leadership (2015–2019, USA)

WHY YOU WANT ME ON YOUR TEAM

I Think in Billions – Validated product visions with the potential to drive in high value - **End-to-End Product Builder** – From insight to execution, I design, validate, and build innovative AI-first solutions - **Business + Engineering Fluency** – I speak both strategy and systems for smooth cross-functional collaboration - **Next-Gen Product Designer** – Combining AI, psychology, and deep UX to solve tomorrow's problems - **Prompt Architect** – Expert in designing AI prompts that feel human and drive results - **User-First Mindset** – Everything I create is grounded in empathy and real user needs.

EXCLUSIVE OPPORTUNITY:

The first company to hire me will gain **exclusive access** to breakthrough product visions I've crafted over the past two years—designed for next-gen AI ecosystems. These concepts, when executed with precision, have the potential to unlock **$1T–2T+ in annual revenue.**

They represent game-changing ideas across two powerful technologies. Early adoption can position your company at the very top of the AI revolution.

Let's build the future—together.
